

Consolidating Media into the hands of a few megapoly businesses is intuitively a bad idea. The frequency spectrum is a public resource, and advertising pays for commercial broadcasts. Where do we expect to get unbiased news and political commentary if in effect a monopoly exists, not to mention a cabal to increase media costs to the public, --- for what is/was a public asset.

Stop this nonsense. Similar messages are being sent to my congressional representatives voicing violent oppositon to this docket and the lobby that supports it.
